

THE WESLEY GROUP (BVI), INC.

and its affiliates:

HISTORY

During our domestic tenure, we owned one of the most successful Diversity Business Enterprises in the USA, Wesley Industries. Wesley was a holding company consisted of several independent strategic business units: New Haven Foundry, Flint Coatings, Yale Powder Coatings, and Arnold Electronics & Defense.

At the time, our Foundry was Chrysler's 74th largest global supplier and their largest diversity supplier. The foundry was one of the largest manufacturers of complex-core gray iron castings in North America making all of Chrysler's truck and Jeep V-6, V-8, V-10 and V-12-cylinder heads.

Wesley also owned Coating Operations in Michigan, Iowa and Canada, applying Electrodeposition and Powder coatings and provided additional value-added services such as assembly, repair and packaging as both a Tier I and Tier II supplier. All of which were approved sources to GM, Ford, and Chrysler making us the fourth largest applicator in the United States.

Wesley was a major supplier to The Department of Defense (DOD), where we fabricated welded, assembled wired electronic components and produced all of the fix wing rocket launchers for our Nation's military planes and helicopters.

Additional Points:

- Purchased controlling interest in New Haven Foundry from a publicly traded company, Margate Industries; retired their 45% interest to obtain 100% ownership. Through the relationship, Margate saw its stock value increase from 24 cents per share to \$1.50 per share.
- Partnered with Bain Capital of Boston, in an attempt to purchase Winston Tire, a tire retail distributor in California, with \$100 Million in annual retail sales.
- Partnered with Magna of Canada, to purchase and split General Motor's \$1.8 Billion global seating division.
- Partnered with Bain Capital of Boston, to purchase Motor Wheel as well as consulted for the DOD on their various start-ups.
- Purchased over 300 acres in Madhya Pradesh, India to develop the country's fourth 27-hole golf resort and the countries only PGA licensed resort.
- Joint ventured with CMS Marketing Services & Trading (CMS MS&T) and utilized their trade desk to wheel electricity across states becoming one of the largest providers and participants in Michigan's electrical deregulation.

Trading and Business Development

Wesley Group, LLC has partnered with AI/Vot headed by Alok Tiwari of India to become a global business development and trading company. Our core competency is best highlighted in our ability to monetize relationships to obtain large-scale procurement opportunities that others would have difficulty or the inability to obtain. Our success comes in our ability to consistently place our thumbprint on each transaction and establish exclusive partnerships with selective world class businesses who are experts and more narrowly focused on the various commodities that we are sourcing globally. Key geographic areas: India, China, Vietnam, Italy, Ukraine, Central Africa and USA.

Although we are open towards exploring new relationships internationally and domestically, the four principal categories of trading which represent over 30 commodities include:

1. Energy products (Fuel, Oil and Gas)
2. Ferrous and Non-Ferrous Metals
3. Agricultural Products
4. India Infrastructure Development/ Business Ownership

Manufacturing Solutions

VALINDO, an acronym derived from "The Value obtained from India," was formed to address the International market's rapidly growing demand for low priced, high quality durable goods.

Our business model is driven by over 40 years of business experience and joint ventures around the world which have allowed us to monetize our skills and capitalize on market trends in the automotive, agricultural, military defense, and strategic non-automotive industries.

Our ongoing success derives from exclusive partnerships with selective world-class businesses that are established quality suppliers, experienced in meeting the needs of the ever-changing marketplace.

VALINDO meets its customers' ever-expanding needs with a wheel well of numerous products and services. We provide the capability to backward and vertically integrate into new opportunities as needed, along with the capability to program manage complete manufacturing systems and procurement sourcing.

Key areas of focus are as follows:

CASTINGS (*Raw and Machined*)

- Aluminum
- Gray Iron
- Zinc

FORGINGS

- Impression Die Forging.
- Cold Forging.
- Open Die Forging.
- Seamless Rolled Ring Forging.

ELECTRONICS

- Cable/Wire harnesses
- Small Transformers
- Relay Switches
- Connectors
- Touch Sensor Displays.

VALUE-ADDED ACTIVITIES (*Labor*)

ARTIFICIAL AND INFORMATION TECHNOLOGY

Afflon with its exclusive partnership with AI/VOT <https://aivot.in/index.html> was organized to address a series of global trends that have led to unprecedented innovation in the automotive industry. Connectivity and digitization are the most important trends influencing the global transportation industry. This change is part of a digitally enabled convergence of accelerating technological, social and industry forces that is creating an explosion of innovation in global transportation.

Increasing demand for connectivity and the increasing use of digital sources is pushing consumer purchase decisions. Meeting these demands is a particular challenge for the transportation industry that has historically relied on its use of mechanical components rather than delivering software solutions.

AFFLON develops long-term Artificial Intelligence and IT strategies to support overall business goals for our automotive clients, including manufacturers and suppliers. With our deep understanding of the automotive domain, we are uniquely positioned to increase our client's operational efficiency, profitability, market presence, and to build lasting customer relationships through the utilization of customized AI.

<https://kat5terminals.com/>

We took ownership in KAT5 to address a void in the battery terminal market. KAT5's product line is a patent pending unique solution to common problems associated with wiring accessories for vehicles, rail, boats, etc.. The KAT5 multi-connection battery terminal system is designed to bring quick resolution to common battery terminal issues. The multi-connection battery terminal features three or five-way options that allow consumers to manage all of their battery power needs quickly and safely.

The battery terminals effectively limiting the need for multiple batteries, saving you time, and money. They are also made of stainless steel hardware and solid zinc, which provides improved conductivity and lighter weight when compared to the lead alternatives. They are also free of harmful chemicals and extremely corrosion resistant. Popular industries of interest consist but are not limited to the following:

- Marine
- Agriculture
- Rail
- Military Defense
- Automotive
